

Care Monitor Price List

Valid from 1 November 2008

System components

A Care Monitor system includes installation of the following in each resident's room:

- Hub Unit, incorporating automatic night-light
- Power Supply Unit
- Bed Sensor
- Door Sensor

In addition, each installation of Care Monitor includes one Central Controller per home with bespoke Care Monitor software, a pager base station with 6 pagers and an ink-jet printer.

System Price

Care Monitor can be installed for as little as £1.20 per room, per day.

System Prices are based on a 3-year lease agreement (subject to individual financial status). Prices are indicative and subject to site survey.

Outright purchase options are also available: please contact LifeSys to discuss this further.

Prices include installation (subject to survey), full staff training, telephone support during normal business hours and a LifeSys 3-year Guarantee (detailed terms apply).

Inco Sensors

An Incontinence (Inco) Sensor may also be connected to the in-room system. Inco Sensors are optional and not included in the system price.

Inco Sensors cost £35 each. Inco Sensors are guaranteed for a maximum of 150 washes / 1 year.

All prices are subject to VAT.

LifeSys Limited terms and conditions of sale will apply.
