

Care Monitor Price List

System components

A standard Care Monitor system includes installation of the following in each resident's room:

- Hub Unit, incorporating automatic night-light
- Power Line Communication Unit
- Bed Sensor
- Door Sensor

In addition, each installation of Care Monitor includes one Central Controller computer per home with bespoke Care Monitor software, a pager base station with the necessary number of pagers and an ink-jet printer.

System Price

The system price is variable and depends on the size of the home, number of beds, the chosen options, etc. Please contact LifeSys for further information.

Capital purchase or finance options are available: please contact LifeSys to discuss this further.

LifeSys Limited terms and conditions of sale will apply.
